EDUCATION:

University of North Carolina at Charlotte (UNCC), Charlotte, NC

GPA: 3.79 Expected Graduation December 2026

Bachelor of Arts in Computer Science | Concentration: Human Centered Design | Honors: Chancellor's List Spring 2025 Dean's List Fall 2025

Mitchell Community College, Statesville, NC

GPA: 3.6 Graduation May 2024

Associate of Applied Science | Concentration: Software Development | Honors: Dean's List: Fall 2022 – Spring 2024. Graduated with Honors

Certificates (Mitchell Community College)

Mobile Device Programming, Database Foundations, Information Technology Foundations, Computer Science Foundations, Software Development Foundations

TECHNICAL SKILLS:

Languages: Python, Java, C++, C#, JavaScript

Frameworks & Libraries: JavaFX, Spring(Basic), Maven, Gradle, Processing

Data & Analytics: SQL, PowerBI, Excel, R(basic statistical analysis)

Tools & Development Environments: Git, GitHub, VS Code, Eclipse, IntelliJ, Android Studio, Arduino

Game Development: Unreal Engine 5(C++), game logic scripting, asset integration

PROJECTS:

Arduino Powered Alarm Clock and Automatic Nightlight for ITIS-4350 Physical Computing December 2025

- 3D modeled nightlight component of project using Fusion Autodesk
- Created circuit using Tinkercad Circuit design interface to prototype circuit before building physically.

Dealer LPO Organizer (Java Desktop Application) June 2023-July 2023

- Developed a Java desktop application using JavaFX for UI, Maven for dependency management, and Apache Derby as the relational database to manage dealer-installed accessory (LPO) tracking by vehicle VIN.
- Created a Python script to parse Chevrolet LPO PDF sheets and automatically generate SQL insert scripts for yearly database updates.
Implemented custom user authorization and designed an efficient SQL import workflow to ensure data accuracy and operational continuity.

PERSONAL PROJECTS:

Perlin Noise Animated Horizon Screensaver August 2025-October 2025

- Utilized Processing IDE to write a script using Noise function to explore procedural generation
- Applied domain warping to generation to give terrain realistic variation
- Introduced a sinusoidal function to oscillate and scale the sun on the horizon to give the illusion of depth

Ollama Powered Discord Chatbot February 2026-March 2026

- Developed a Discord chatbot in **Node.js** integrating a locally hosted **Ollama** large language model to provide conversational AI capabilities.
- Designed and implemented custom persona-based responses, managing local model hosting, API integration, and real-time Discord interactions.

WORK EXPERIENCE:

Randy Marion Chevrolet of Statesville

Quick Lane Manager, Statesville, NC

Feb 2024 – Mar 2026

- Utilized the Reynolds and Reynolds platform and app to oversee multi-point vehicle inspections, documenting critical components per General Motors standards, ensuring compliance and accuracy.
- Guided team members in efficient inspection completion and provided detailed diagnostics for uncommon vehicle issues, improving service quality and customer satisfaction.
- Collaborated with service manager to track upsales and monitor oil rack labor hours, contributing to a consistent increase in monthly oil rack hours from 380 to over 400.

Randy Marion Chevrolet of Statesville

Automotive Technician, Statesville, NC

Oct 2013 – Aug 2022

- Diagnosed complex mechanical and electrical issues using GM's MDI2 diagnostic tool and Techline Connect software to efficiently troubleshoot vehicle systems.
- Escalated advanced or unresolved issues on new vehicles to General Motors engineering teams, collaborating to identify root causes and solutions.
- Trained and assisted junior technicians on diagnostic procedures, tool usage, and safety protocols, fostering team skill development and operational consistency.
- Communicated complex technical information clearly to advisors and customers, enhancing trust and satisfaction.
